17. REPORTING ALLERGIC REACTIONS.....	18

1. Aims and Objectives

- 1.1 This policy outlines the approach at St Hugh's School to allergy management, including how the whole-school community works to reduce the risk of an allergic reaction happening and the procedures in place to respond if one does. It follows the most recent statutory government guidance: [Allergy safety in schools - GOV.UK](https://www.gov.uk/government/publications/allergy-safety-in-schools)
- 1.2 It also sets out how we support our pupils with allergies to ensure their wellbeing and inclusion, as well as demonstrating our commitment to being an allergy aware school.

1.3 This policy applies to all staff, pupils, parents and visitors to the school and should be read alongside these other policies:

- First Aid and Medical Policy
- Safeguarding and Child Protection Policy
- Supervision Policy
- Pupil Mental Health Policy

2. What is an Allergy?

- 2.1 Allergy occurs when a person reacts to a substance that is usually considered harmless. It is an immune response and instead of ignoring the substance, the body produces histamine which triggers an allergic reaction.
- 2.2 Whilst most allergic reactions are mild, causing minor symptoms, some can be very serious and cause anaphylaxis, which is a life-threatening medical emergency.
- 2.3 People can be allergic to anything, but serious allergic reactions are most commonly caused by food, insect venom (such as a wasp or bee sting), latex and medication.

3. Definitions

- 3.1 **ANAPHYLAXIS:** Anaphylaxis is a severe allergic reaction that can be life-threatening and must be treated as a medical emergency.
- 3.2 **ALLERGEN:** A normally harmless substance that, for some, triggers an allergic reaction. You can be allergic to anything. The most common allergens are food, medication, animal dander (skin cells shed by animals with fur or feathers) and pollen. Latex and wasp and bee stings are less common allergens. Most severe allergic reactions to food are caused by just 9 foods. These are eggs, milk, peanuts, tree nuts (which includes nuts such as hazelnut, cashew nut, pistachio, almond, walnut, pecan, Brazil nut, macadamia etc), sesame, fish, shellfish, soya and wheat. There are 14 allergens required by UK law to be highlighted on pre-packed food. These allergens are celery, cereals containing gluten, crustaceans, egg, fish, lupin, milk, molluscs, mustard, peanuts, tree nuts, soya, sulphites (or sulphur dioxide), and sesame.
- 3.3 **ADRENALINE AUTO-INJECTOR:** Single-use device which carries a pre-measured dose of adrenaline. Adrenaline auto-injectors are used to treat anaphylaxis by injecting adrenaline directly into the upper, outer thigh muscle. Adrenaline auto-injectors are commonly referred to as AAls, adrenaline pens or by the brand name EpiPen. There are two brands licensed for use in the UK: EpiPen and Jext Pen. For the purposes of this Policy we will refer to them as adrenaline pens, however staff have been trained at

INSET to understand that adrenaline pens can mean any brand of autoinjector including sprays.

- 3.4 **ALLERGY ACTION PLAN:** This is a document filled out by a healthcare professional, detailing a person's allergy and their treatment plan. This is used to inform our Individual Healthcare Plans detailed below.
- 3.5 **DESIGNATED ALLERGY LEAD:** - Mrs Natalie Wallis with Deputy - Matron Mrs Marlene Green.
- 3.6 **NEFFY:** Neffy (official name in the UK is EURNeffy) is a nasal spray which delivers adrenaline. It is a needle-free alternative to an adrenaline auto-injector approved. [Neffy was approved for use in the UK in 2025 and distribution is expected from late September. There is a factsheet attached to this Policy for reference. Staff are trained in different types of auto injectors as and when they are prescribed and an Individual Healthcare plan is in place.
- 3.7 **INDIVIDUAL HEALTHCARE PLAN:** A detailed document outlining an individual pupil's medical conditions, history, treatment, risks and action plan. This document is created by Matron in collaboration with parents/carers and, where appropriate, pupils. All pupils with an allergy have an Individual Healthcare Plan and it should be read in conjunction with their Allergy Action Plan.
- 3.8 **RISK ASSESSMENT:** At St Hugh's School we have in-school risk assessments and off site risk assessments. Staff are reminded to include allergy risks in their risk assessments, in classrooms, around school and off site. A detailed document outlining an activity, the risks it poses and any actions taken to mitigate those risks are included.
- 3.9 **SPARE ADRENALINE PENS:** In school we have 2 spare adrenaline pens in safe, locked but accessible storage in the staff room and the sports hall.

4. Roles and Responsibilities

- 4.1 St Hugh's School takes a whole-school approach to allergy management.
- 4.2 **Designated Allergy Lead** - The Designated Allergy Lead is Mrs Natalie Wallis. She is the Deputy Head and on the SLT. They are responsible for:
- Ensuring the safety, inclusion and wellbeing of pupils and staff with an allergy;
 - Taking decisions on allergy management across the school;
 - Championing and practising allergy awareness across the school;
 - Being the overarching point of contact for staff, pupils and parents with concerns or questions about allergy management;

- Ensuring allergy information is recorded, up-to-date and communicated to all staff
- Making sure all staff are appropriately trained, have good allergy awareness and realise their role in allergy management (including what activities need an allergy risk assessment);
- Ensuring staff, pupils and parents have a good awareness of the school's Allergy and Anaphylaxis Policy, and other related procedures. [Consider obtaining and recording confirmation from staff that they have read and understood the policy];
- Reviewing the school's stock of spare adrenaline pens and ensuring staff know where they are;
- Keeping a record of any allergic reactions or near-misses, reporting these to the appropriate authority (e.g. under RIDDOR) where necessary and ensuring the circumstances are investigated and learnings shared;
- Regularly reviewing and updating the Allergy and Anaphylaxis Policy; and
- Ensuring there is an anaphylaxis drill once a year.

4.3 At regular intervals the Designated Allergy Lead will check procedures and report to the SMT.

4.4 **School nurse/ Healthcare team/ Medical Lead** - Miss Marlene Green - Matron - is responsible for:

- Collecting and coordinating the paperwork (including Allergy Action Plans and Individual Healthcare Plans) and information from families (this is likely to involve liaising with the admissions team for new joiners);
- Supporting the Designated Allergy Lead with disseminating this information to all school staff, including the catering team, occasional staff and those running clubs;
- Ensuring the information from families is up-to-date, and reviewed annually (at a minimum) coordinating medication with families and ensuring medication is in date;
- Keeping an adrenaline pen register to include adrenaline pens prescribed to pupils and the school's stock of spare adrenaline pens, including brand, dose and expiry date.
- Regularly checking spare adrenaline pens are where they should be, and that they are in date;
- Replacing the spare adrenaline pens when necessary;
- Providing on-site adrenaline pen training for staff and pupils and refresher training as required e.g. before school trips; and

- There is a clear method to capture allergy information or special dietary information at the earliest opportunity, this is in place before a school visit, an Open Day or Taster Days if food is offered or likely to be eaten.
- There is a clear structure in place to communicate this information to the relevant parties (i.e. school nursing team, catering team);
- Parents and applicants are informed of catering arrangements during admission events; and
- Plans are made for emergency medication if the child is to be left without parental supervision.

4.5 **All staff** - All school staff, including teaching staff, support staff, trainee teachers, volunteers and contractors has a responsibility to be:

- Championing and practising allergy awareness across the school;
- Reading, understanding and putting into practice the Allergy and Anaphylaxis Policy and related procedures, and asking for support if needed;
- Being aware of pupils (and staff, when necessary) with allergies and what they are allergic to;
- Considering the risk to pupils with allergies posed by any activities and assessing whether the use of any allergen in activity is necessary and/or appropriate;
- Ensuring pupils always have access to their medication or carrying it on their behalf as per the First Aid and Medical Policy.
- Being able to recognise and respond to an allergic reaction, including anaphylaxis, after appropriate training;
- Taking part in training and anaphylaxis drills as required (at least once a year). Whilst it is the school's responsibility to ensure staff have received annual training, if the member of staff is aware they have not received any allergy training in the last 12 months they should alert a manager;
- Considering the safety, inclusion and wellbeing of pupils with allergies at all times. Preventing and responding to allergy-related bullying, in line with the school's anti-bullying policy;
- Forwarding any communication or information that comes directly to them from parents regarding allergens to the School Nurse/ Healthcare Team; and
- Ensuring that pupils have their medication and their Allergy Action Plan or Individual Health Care Plan with them when leaving school site, for a match or trip.

4.6 **All parents** - All parents and carers (whether their child has an allergy or not) are responsible for:

- Being aware of and understanding the school's Allergy and Anaphylaxis Policy and considering the safety and wellbeing of pupils with allergies;
- Providing the Matron with information about their child's medical needs, including dietary requirements and allergies, history of their allergy, any previous allergic reactions or anaphylaxis. They should also inform the school of any related conditions, for example asthma, hay fever, rhinitis or eczema;
- Considering and adhering to any food restrictions or guidance the school has in place when providing food, for example in packed lunches, as snacks or for fundraising events. This is primarily no peanuts in school. Parents are reminded that we do have children in school who are Gluten Free and we can provide them with alternatives if parents are unable to.
- Refraining from telling the school their child has an allergy or intolerance if this is a preference or dietary choice; and
- Encouraging their child to be allergy aware.

4.7 **Parents of children with allergies** - In addition to point 4.5, the parents and carers of children with allergies should:

- Work with the school to fill out an Individual Healthcare Plan and provide an accompanying Allergy Action Plan;
- If applicable, provide the school or their child with two labelled adrenaline pens and any other medication, for example antihistamine (with a dispenser, ie. spoon or syringe), inhalers or creams;
- Ensure medication is in-date and replaced at the appropriate time;
- Ensure their child has access to their allergy medication, including two adrenaline pens if prescribed, on the journey to and from school;
- Update school with any changes to their child's condition and ensure the relevant paperwork is updated too;
- Provide the school with an up-to-date photograph of their child and sign the associated permission for it to be shared appropriately as part of their allergy management; and
- Support their child to understand their allergy diagnosis and to advocate for themselves and to take reasonable steps to reduce the risk of an allergic reaction occurring e.g. not eating the food to which they are allergic.

4.8 **All pupils** - All pupils at the school should:

- Be allergy aware;

- Understand the risks allergens might pose to their peers and respect measures to support them;
- Learn how they can support their peers and be alert to allergy-related bullying;
- Older pupils will learn how to recognise an allergic reaction and support their peers and staff in case of an emergency; and
- Be aware of restrictions in school. This includes peanuts and shows an awareness for children who are Gluten Free. This applies to children in the main school. Children in Pre-Prep are taught and guided by staff and parents.

4.9 **Pupils with allergies** - In addition to point 4.7, pupils with allergies are responsible for:

- Knowing what their allergies are and how to mitigate personal risk if they are in main school and supported to do this in the Pre-Prep and Early Years by staff and parents.
- Avoiding their allergen as best as they can;
- Understanding the importance of following the school specific processes of lunch and snack services and how that mitigates risk;
- Understanding that they should notify a member of staff if they are not feeling well, or suspect they might be having an allergic reaction;
- Carrying y two adrenaline auto-injectors with them at all times, if age and capability appropriate. They must only use them for their intended purpose;
- Understanding how and when to use their adrenaline auto-injector;
- Talking to the Designated Allergy Lead or a member of staff if they are concerned by any school processes or systems related to their allergy;
- Raising concerns with a member of staff if they experience any inappropriate behaviour in relation to their allergies;
- Pupils permitted to leave the school site [during the school day or at a Boarding School] should know what to do if they have an allergic reaction off school premises. This should include how to treat themselves and raise the alarm to get help; and
- If age and capability appropriate, ensure they have their medication with them on the journey to and from school.

5. **Information and Documentation**

- 5.1 **Register of pupils with an allergy** - The school has a register of pupils who have a diagnosed allergy. This includes children who have a history of anaphylaxis or have been prescribed adrenaline pens, as well as pupils with an allergy where no adrenaline pens have been prescribed.

5.2 **Individual Healthcare Plans** - Each pupil with an allergy has an Individual Healthcare Plan. The information on this plan includes:

- Known allergens and risk factors for allergic reactions;
- A history of their allergic reactions;
- Detail of the medication the pupil has been prescribed including dose, this should include adrenaline pens, antihistamine etc;
- A copy of parental consent to administer medication, including the use of spare adrenaline pens in case of suspected anaphylaxis;
- A photograph of each pupil; and
- A copy of their Allergy Action Plan. See definitions for the BSACI templates.

6. **Assessing Risk**

6.1 Allergens can crop up in unexpected places. Staff (including visiting staff) will consider allergies in all activity planning and include it in risk assessments. Some examples include:

- Classroom activities, for example craft using food packaging, science experiments where allergens are present, food lessons or cooking;
- Bringing animals into the school, for example a dog or hatching chick eggs can pose a risk;
- Running activities or clubs where they might hand out snacks or food “treats”. Ensure safe food is provided or consider an alternative non-food treat for all pupils; and
- Planning special events, such as cultural days and celebrations.

6.2 Inclusion of pupils with allergies must be considered alongside safety and they should not be excluded. If necessary, adapt the activity. The School will ensure compliance with the Equality Act 2010.

7. **Food, Including Mealtimes and Snacks**

7.1 **Catering in school** - The school is committed to providing a safe meal for all students, staff and visitors, including those with food allergies.

- Due diligence is carried out with regard to allergen management when appointing catering staff;
- All catering staff and other staff preparing food will receive relevant and appropriate allergen awareness training;
- At St Hugh’s School we follow the [Early years foundation stage \(EYFS\) statutory](#)

[framework - GOV.UK](#) Our school policy meets the requirements of the framework and also allows for our youngest children trying foods for the first time, at an age when they could develop an allergy that was previously unknown.

- Anyone preparing food for those with allergies will follow good hygiene practices, food safety and allergen management procedures;
- The catering team will endeavour to get to know the pupils with allergies and what their allergies are, supported by school staff;
- The catering team will endeavour to provide varied meal options to students and staff with allergies;
- The school has robust procedures in place to identify pupils with food allergies, these are a check in from Matron and communication from Form Tutor on their arrival. Their Medical Update is shared with all staff in the Staff Room and includes a photograph. Contact is made with Parents by Matron to confirm details.
- The main 14 allergens are listed in the dining room and communicated to staff.
- Pre-packaged food will comply with PPDS legislation (Natasha's Law) requiring the allergen information to be displayed on the packaging;
- Where changes are made to the ingredients this will be communicated to pupils with dietary needs by Lee Wilson (Catering Manager)
- Products with Precautionary Allergen Labelling or "May Contain" labelling are considered to have the allergens listed and are treated as such.
- Food provided at all meal times, including packed lunches are treated in the same way.
- Nuts are not allowed in school, both for in-house catering and for food items brought into school from home. Parents are informed about restrictions in section 7.3. This list is added to as and when needed. Food brought in from home, such as cakes for a bake sale, are considered to contain Gluten unless labelled otherwise and a list of ingredients provided. This applies to egg/milk and other allergens.
- We do not sell food on site, in a tuck shop for example, however cake sales may include a variety of items and these are presumed to contain allergens and children with allergies are not allowed to access them unless directed. Alternative arrangements are made for them so they can access a treat that is appropriate.

7.2 Food brought into school - Please see 7.3

7.3 Food bans or restrictions - At St Hugh's School we appreciate that messaging around the restriction of certain foods needs careful consideration. We aim to send a message to all

stakeholders in school that does not lead to a sense of complacency or give a false sense of security. To this end we remind everyone to be allergy aware and to remain vigilant at all times. Whilst peanuts and other tree nuts are no more dangerous than other allergens depending on the individual case, we do continue to give out the following advice:

- This school is an Allergen Aware school. We have students with a wide range of allergies to different foods, so we encourage a considered approach to bringing in food;
- We try to restrict peanuts and tree nuts on the site. We check all foods coming into the kitchen; and we ask that all food coming onto school premises or taken on a school trip or to a match is checked to ensure peanuts and tree nuts are not an ingredient in another product. Please check the label on all foods brought in. Common foods that contain these goods as an ingredient include: packaged nuts, cereal bars, chocolate bars, nut butters, chocolate spread, sauces.

7.4 Food hygiene for pupils

- Pupils will wash their hands before and after eating;
- Sharing, swapping or throwing food is not allowed;
- Water bottles should be clearly labelled; and
- In the classroom as well as the boarding house the children are taught about food hygiene, this is also part of the PSHE Curriculum on Personal Hygiene.

8. Educational Visits and Sports Fixtures

- 8.1 Staff leading the trip will have a register of pupils with allergies and details of their medication. Staff should notify the trip leader of any allergies.
- 8.2 Allergies will be considered on the risk assessment and catering provision put in place.
- 8.3 Parents, and pupils where appropriate, may be consulted if considered necessary, or if the trip requires an overnight stay.
- 8.4 Staff (and some pupils, if appropriate) accompanying the trip will be trained to recognise and respond to an allergic reaction.
- 8.5 Allergens will be clearly labelled on catered packed lunches. Arrangements are made for children to have specially labelled packed lunches for a variety of allergens.

9. Insect Stings

- 9.1 Those children or staff with a known insect venom allergy should:

- Avoid walking around in bare feet or sandals when outside and when possible keep arms and legs covered;
- Avoid wearing strong perfumes or cosmetics; and
- Keep food and drink covered.

9.2 At St Hugh's School our grounds keepers monitor all areas of the school for nests and possible colonies of bees/wasps and other insects. Pupils (with or without allergies) know that they should notify a member of staff if they find a wasp or bee nest in the school grounds and avoid them.

10. Animals

10.1 Precautions to limit the risk of an allergic reaction include:

- A pupil with a known animal allergy should avoid the animal to which they are allergic;
- If an animal comes on site a risk assessment will be done prior to the visit;
- Areas visited by animals will be cleaned thoroughly;
- Anyone in contact with an animal will wash their hands after contact;
- If an animal lives on site, for example in a Boarding House, pupils, parents and staff will be made aware and consideration and adaptations will be made; and
- School trips that include visits to animals will be carefully risk assessed.

11. Allergic Rhinitis/Hayfever

11.1 Parents provide information on the medical form and provide school with medication if needed. However we do also hold a supply of hayfever medication, which can be administered to a child with consent from parents. Matron will phone parents to ask if they have had any that day, if they are OK to have some and check the type of medication if they have had any before. Hayfever can start and continue to develop in childhood, so communication with parents is key.

12. Inclusion and Mental Health

12.1 Allergies can have a significant impact on mental health and wellbeing. Pupils may experience anxiety and depression and are more susceptible to bullying.

- No child with allergies is ever excluded from taking part in a school activity, whether on the school premises or a school trip;
- Pupils with allergies may require additional pastoral support including regular check-ins from their Tutor or Head of School

- Affected pupils will be given consideration in advance of wider school discussions about allergy and school Allergy Awareness initiatives; and
- Bullying related to allergy will be treated in line with the school's anti-bullying policy.

12. Adrenaline Pens

12.1 [See the government guidance on Adrenaline Pens in Schools.](#)

12.2 Storage of adrenaline pens:

- Pupils prescribed with adrenaline pens will have easy access to two, in-date pens at all times;
- The location for the pens is agreed with each family, communicated with key adults and shared on the whole school staff information board.
- Spot checks are made to ensure adrenaline pens are where they should be and in date;
- Adrenaline pens are kept locked away;
- Adrenaline pens are stored at a moderate temperate in a dry box
- Used and out of date pens are disposed of as sharps.

12.3 Spare adrenaline pens:

12.4 This school has 2 spare adrenaline pens to be used in accordance with government guidance.

12.5 The locations of spare adrenaline pens are clearly signposted. These are: in the sports hall entrance and in the staff room.

12.6 The Senior Leadership Team (SLT) are responsible for:

- Deciding how many spare pens are required
- What dosage is required, based on the Resuscitation Council UK's age-based guidance.
- The purchasing of spare adrenaline pens which can be obtained at low cost from a local pharmacy.
- Distribution around the site and clear signage.

12.7 Adrenaline pens on off-site activities:

- No child with a prescribed adrenaline pen will be able to go on a school trip without two of their own devices. It is the trip leader's responsibility to check they have them;
- Adrenaline pens will be kept close to the pupils at all times e.g. not stored in the

- hold of the coach when travelling or left in changing rooms;
- Adrenaline pens will be protected from extreme temperatures;
- Staff accompanying the pupils will be aware of pupils with allergies and be trained to recognise and respond to an allergic reaction; and
- Consider whether to take spare adrenaline pens to off-site activities. This should be recorded as part of the risk assessment process.

13. Responding to an Allergic Reaction/Anaphylaxis

13.1 See appendix on recognising and responding to an allergic reaction.

13.2 If a pupil has an allergic reaction:

- Treat the pupil in accordance with their Action Plan;
- If anaphylaxis is suspected administer adrenaline without delay;
- Treat the pupil where they are. Lie them down with their legs raised and bring medication to them;
- Use pupil's own prescribed medication if immediately available;
- Pupils can administer the adrenaline pen themselves [if able to] or a member of staff can administer a pen. Ideally the member of staff will be trained, but in an emergency, anyone can administer adrenaline;
- If the pupil's own adrenaline pen is not available or misfires, then use a spare adrenaline pen;
- If anaphylaxis is suspected but the pupil does not have a prescribed adrenaline pen or Action Plan, lie the pupil down with their legs raised, call 999 and explain that anaphylaxis is suspected. Inform the operator that spare adrenaline pens are available and follow instructions from the operator. The MHRA says that in exceptional circumstances, a spare adrenaline pen can be administered to anyone for the purposes of saving their life;
- If, after 5 minutes, there is no improvement, use a second adrenaline pen and call the emergency services again and inform them that a second dose of adrenaline has been given;
- Do not move the pupil until a medical professional/ paramedic has arrived, even if they are feeling better; and
- Anyone who has had suspected anaphylaxis and received adrenaline must go to hospital, even if they appear to have recovered. A member of staff should accompany them in an ambulance until a parent or guardian arrives.

14. Training

14.1 The school is committed to training all staff annually to give them a good understanding of allergy.

14.2 This includes:

- Understanding what an allergy is;
- How to reduce the risk of an allergic reaction occurring;
- How to recognise and treat an allergic reaction, including anaphylaxis
- How the school manages allergy
- Where adrenaline pens are kept (both prescribed pens and spare pens) and how to access them;
- The importance of inclusion of pupils with food allergies, the impact of allergy on mental health and wellbeing and the risk of allergy related bullying;
- Understanding food labelling; and
- Taking part in an anaphylaxis drill.

14.3 The school carries out an anaphylaxis drill once a year. This year it was completed in September this year and overseen by Natalie Wallis. It included an exercise simulating an event where a pupil or member of staff has an allergic reaction and testing the whole school response.

15. Asthma

15.1 It is vital that pupils with allergies keep their asthma well controlled, because asthma can exacerbate allergic reactions. Please see our First Aid and Medical Policy.

16. Reporting Allergic Reactions

16.1 The school will log allergic reaction incidents and near-misses as usual on ISAMS.
